# Occupational Specialism Overview

It's a long haul event!

# TL:DR

- 67 hour assessment across 9 weeks
- 4 tasks
  - Analysis and design
  - Development and testing
  - Collecting feedback
  - Final evaluation

# What you need to make

- You will do the support work around and then deve

- A system using at least 2 programming languages
  solve the set brief.

- Then collect feedback on your system, review how
  it meets the set out requirements and set out prio
  for future development.

# Programming languages - Ration

- HTML / CSS

- PHP

- MySQL

# Your work

- Has to stay in school / on the computers (until the [end?]
of each task)
- You can research / practice at home as much as y[ou]
like, you can talk and collaborate with peers
- BUT you cannot take anything out of a task and ca[nnot?]
bring anything into a task

# Use of generative A.I.

- Snippets

# Resources

- See Dev Environment Presentation

- https://www.w3schools.com/  - particularly the HTI
  CSS, PHP, MYSQL sections

# Key Dates

- Mock 1 - 10/11 - 2 weeks

- Mock 2 - 05/01/26 – 1 week

- Task 1 starts 09/03/26 for 2 weeks – 20 hours

- Task 2 starts 23/03/26 for 7 weeks (2 weeks are Easter) - 30 hou

- Task 3a starts 27/04/26 for 1.5 weeks – 15 hours
